

## Miscellaneous

### **Q. Where can I find information on clinical trials?**

A. Please visit the [Clinical Trials webpage](#) and see our [FAQ's on clinical trials](#).

### **Q. What should I consider while using Zoom for research?**

A. If you are conducting an interview remotely via Zoom (or other similar platform) create a private meeting with a unique meeting ID. Consider creating a meeting password to access the interview. If multiple participants are involved, use certain functionality, such as enabling/disabling screen sharing or joining before host, muting participants upon entry, enabling a waiting room, etc. If protecting anonymity is a concern, conduct the interview with audio only, not with video.

For more information on using Zoom, visit the UC Merced Information Technology [Zoom page](#).
